SUMMARY — Front-end Software Engineer with 3 Years of Experience creating dynamic, high-performance web applications using Next.js, React.js, Redux, JavaScript, and so on. Skilled in designing intuitive user interfaces and optimizing applications for seamless responsiveness and functionality. Committed to continuous professional growth, I aim to expand my expertise into full-stack development, driven by a passion for solving complex challenges and delivering impactful solutions across various industries.

SKILLS

Languages: JavaScript, ES6, HTML5, CSS, Bootstrap, MongoDB
Strengths: Adaptability, Leadership, Problem Solving, Time Management

Frameworks / Libraries: React.js, Next.js, Context API, Node.js, Material UI, Tailwind CSS, Chart.js, redux
Developer Tools: Github, VSCode, Vercel, Bitbucket

EXPERIENCE

Software Developer

June 2024 - Present

Freelancer

- Improved website performance using code minification, image optimization, and caching, ensuring cross-browser compatibility.
- Built responsive web applications that integrate with healthcare systems and admin dashboard, and APIs, adapting to various screen sizes.

Web Developer Executive

Sept 2022 - May 2024

Win Upskill, Bangalore

- Developed interactive web applications with React.js, Next.js, Redux, Tailwind CSS, and Material UI for responsive design.
- Integrated external services through APIs, managing data retrieval, mapping, and filtration while ensuring accuracy and stability through effective error management and troubleshooting.
- Optimized application performance and data management for efficiency and user satisfaction, including comprehensive testing to boost speed and reliability.
- Regularly updated and managed code on GitHub, supporting team collaboration and version control.
- Provided leadership and direction as a team lead, facilitating project progress and coordination.

Front-End Developer

Oct 2021 - Aug 2022

Get Ahead Express, Remote

- Developed reusable React components using CSS modules, ensuring a modular codebase and supporting responsive layouts for desktop and tablet through media queries.
- Implemented React Router to create an SPA experience and utilized Chart.js to visualize API data in graphs.

PROJECTS

GIPHY-Clone

React, Context API, Tailwind CSS

- Developed a GIF search and display application mimicking GIPHY's functionality. Utilized React.js for dynamic content and Tailwind CSS for responsive, visually appealing design, integrating the GIPHY API for seamless data retrieval.

E-Commerce Website

React.js, Styled Component

- Developed an e-commerce site with React.js and styled-components, including login/logout features and product filtering. Integrated React Router for navigation, third-party APIs for enhanced functionality, and data visualization.

Admin Dashboard

React.js, Material-UI, Sass

- Integrated external APIs to perform full CRUD operations, enabling seamless data retrieval, creation, updates, and deletions. Implemented efficient filtering mechanisms to enhance data management and improve user experience.

EDUCATION

Lakshmi Narain College of Technology, Bhopal

Aug 2014 – June 2018

Bachelor of Science in Computer Science Engineering

EXTRACURRICULAR

- Founded and managed "Help n Hand" startup, showcasing entrepreneurial drive and project leadership.
- Orchestrated successful events as Head Coordinator, demonstrating effective organizational and teamwork skills.
